

We convert heat into electricity!

To strengthen our team, we are offering an apprenticeship as of summer 2025:

Apprentice metal technology (specialising in mechanical engineering) (m/f/d)

The area of responsibility includes:

- » Working with all types of machining equipment
- » Assembling and installing state-of-the-art Stirling engines
- » Testing the engines on the in-house engine test bench

You offer:

- » Completed compulsory schooling
- » Skilled craftsmanship
- » Interest in technology
- » Good computer skills
- » Careful and conscientious way of working

We offer:

- » Excellent working conditions in new, cosy and air-conditioned rooms
- » A varied and exciting range of tasks
- » The use of state-of-the-art tools at the workplace and on the test benches
- » Familiar working atmosphere and personal support and guidance from the apprentice trainer
- » Attendance at vocational school in Schärding
- » Joint departmental excursions
- » Promotion opportunities after the apprenticeship

Apprentice remuneration of EUR 932.00 gross/month in the 1st year of apprenticeship

We look forward to receiving your application including CV, photo and certificates.
